Gaggle Safety Management User Guide / User & Group Provisioning & Changes   • • •

How does account provisioning work in Gaggle?

Created by Corey Tutewiler
Last updated Nov 04, 2016

Once Gaggle is set up for your school or district, any time you create an account in Google, or Microsoft, the account will automatically be provisioned or created in Gaggle within an hour.

After the Gaggle account has been created, the account will be ready for use. It is important to additionally note that this applies to all accounts on the domain for which we provide content analysis. If your faculty and staff accounts are on a separate domain from your students, then account provisioning will not be applicable to them.
